Decorative LED Suspension Strip Light
Model: CP408
Installation Instructions

superlux
we engineer light

Install using a Registered Electrician.
Isolate power supply

1. Remove mounting bracket from base by unscrewing the 2x knobs
2. Mount bracket in your chosen place using at least 2 of the 4 holes provided-using appropriate fixings for the mounting points.
3. Adjust the suspension and cable supply cord to your required height by pressing down on the glider right next to the cord.
4. Remove the plastic cover from the terminal block. Wire the power supply to the terminal block, Phase to L, Neutral to N and Earth to ⏚. **Important:** replace the plastic cover over the terminal block
5. Slide base onto the mounting bracket and tighten the knobs securely

Note: DO NOT use this light fitting for anything other than its intended purpose. DO NOT use the lighting fixture to support other items.
